

Mission critical communications – Your next revenue stream

Got a great idea for a mission-critical app or accessory – but no access to the mission-critical market?

Team up with a strong partner: join the SmarTWISP programme from Airbus.

SmarTWISP helps you develop professional apps and accessories for the **award-winning Tactilon Dabat**, the world's first smartphone and full TETRA radio in one device.

Join the growing community of innovative developers and start developing your mission-critical app or accessory for this exciting product today.

Together, we can make a difference and help save lives.

AIRBUS

WHY SmarTWISP?

Professional users
want secure apps

The latest Airbus survey on mobile apps reveals an untapped market opportunity for app developers. For most professional users, security is the most important consideration. Consumer apps do not match the security levels of Professional Mobile Radio (PMR) technologies.

60% consider security
as the most important
characteristic of mobile apps

The Ecosystem

SmarTWISP has the tools and support you need to build a secure world-class app or accessory for Tactilon Dabat.

Tactilon Dabat is more than a powerful public safety smartphone - it's also a TETRA radio. For more details, go to www.dabat.com.

What developers say about SmarTWISP

"Our collaboration with Airbus has been very fruitful from the beginning and we had great success at the Hackathon event. Airbus has a great large community to build awareness for our offerings. This is perfect for us."

Andreas Lehner
CTO & Founder
Intelligence on Wheels

"Through Airbus, we have learned about many different domains such as oil & gas and all the defence related aspects. We've collaborated really well with Airbus and have developed two very successful projects with them."

Tuomas Ilola
CEO
Steerpath

Apply for membership

The SmarTWISP programme offers four membership levels. The Basic membership is free and does not require any commitment.

Once you've been accepted into the SmarTWISP programme, you can...

...start developing your mission-critical product with **BASIC** membership on our platform for free

...get **LICENSED** and start testing your app or accessory.

...receive Airbus **CERTIFICATION**.

BONUS: If your product helps boost our sales, you'll become part of our reward scheme.

Ready to start?

Apply now for Basic membership level – it's completely free.
